

Municipal Bulletin – Road Safety and Public Works

Willow Creek, October 22, 2023

To improve road safety and quality of life for our residents, Willow Creek City Hall launched an expanded maintenance operation this month on the town's main roads.

Actions completed:

- Road maintenance: A specialized crew was deployed to repair sidewalks and crosswalks, with particular attention to high-traffic areas.
- Streetlight repairs: Several faulty streetlights were replaced to provide better visibility for nighttime travel.
- Intersection safety upgrades: Additional traffic signs were installed and speed bumps were added in sensitive areas to reduce the risk of accidents.

The initiative, funded through the municipal operating budget, was carried out in coordination with the Public Works Department and local law enforcement. City Hall invites residents to report any issue or anomaly through the dedicated mobile app or directly at the City Hall front desk.

These measures, already appreciated by many residents, are designed to ensure a safe and pleasant urban environment for everyone. Willow Creek City Hall reminds the community that road safety remains a priority and that every report helps us continuously improve our infrastructure.
